

Images in Bb Learn

Image in a learning module

Learning modules serve as a strategic tool for structuring and curating course content. Elevating both the visual allure of the learning modules and the ease of content discernment is important. We provide options for integrating images into learning modules.

- **Search stock images from Unsplash.** With this option, instructors can enter keywords to search for and select high-quality, royalty-free images. When enabled, the AI Design Assistant suggests keywords.
- **Generate images with the AI Design Assistant.** Image generation leverages insights from the learning module description and other contextual cues in the course. To further empower instructors, they can describe the ideal image and regenerate images.

Image 1: Add image option when editing an existing or creating a new learning module

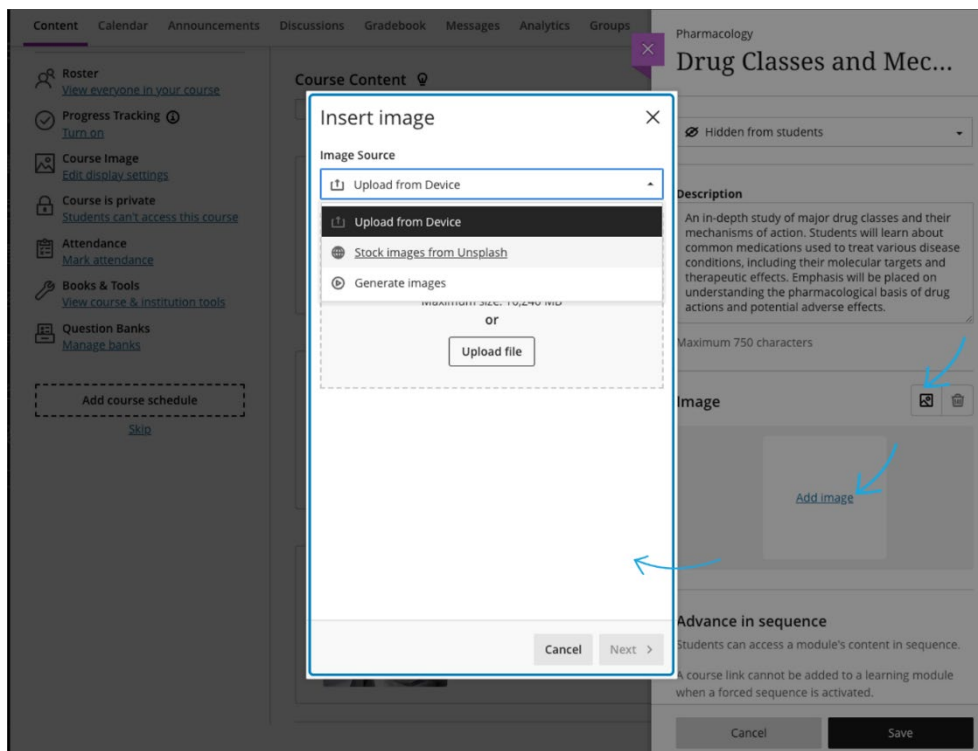

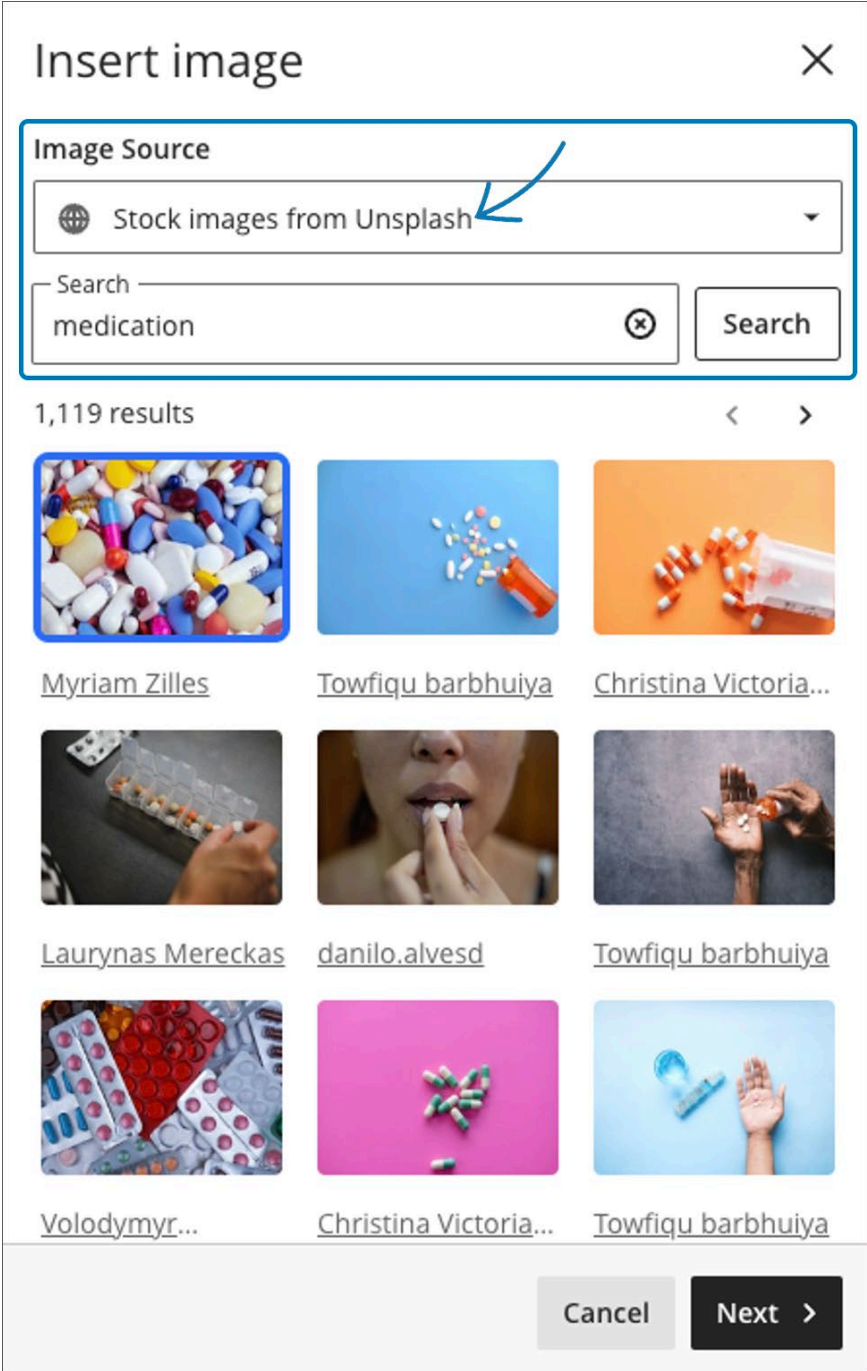

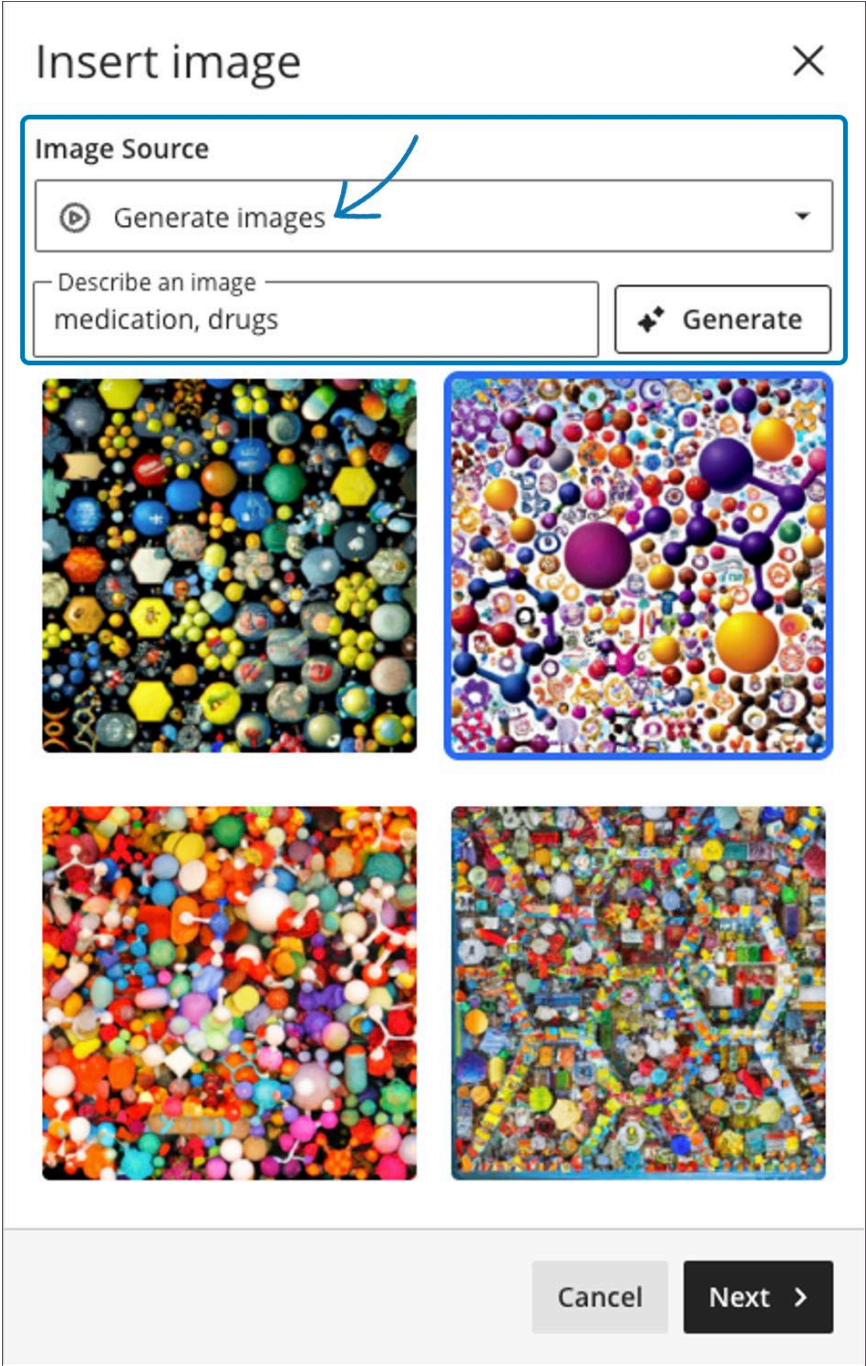

Image 2: Enter keyword (s) and search stock images from Unsplash

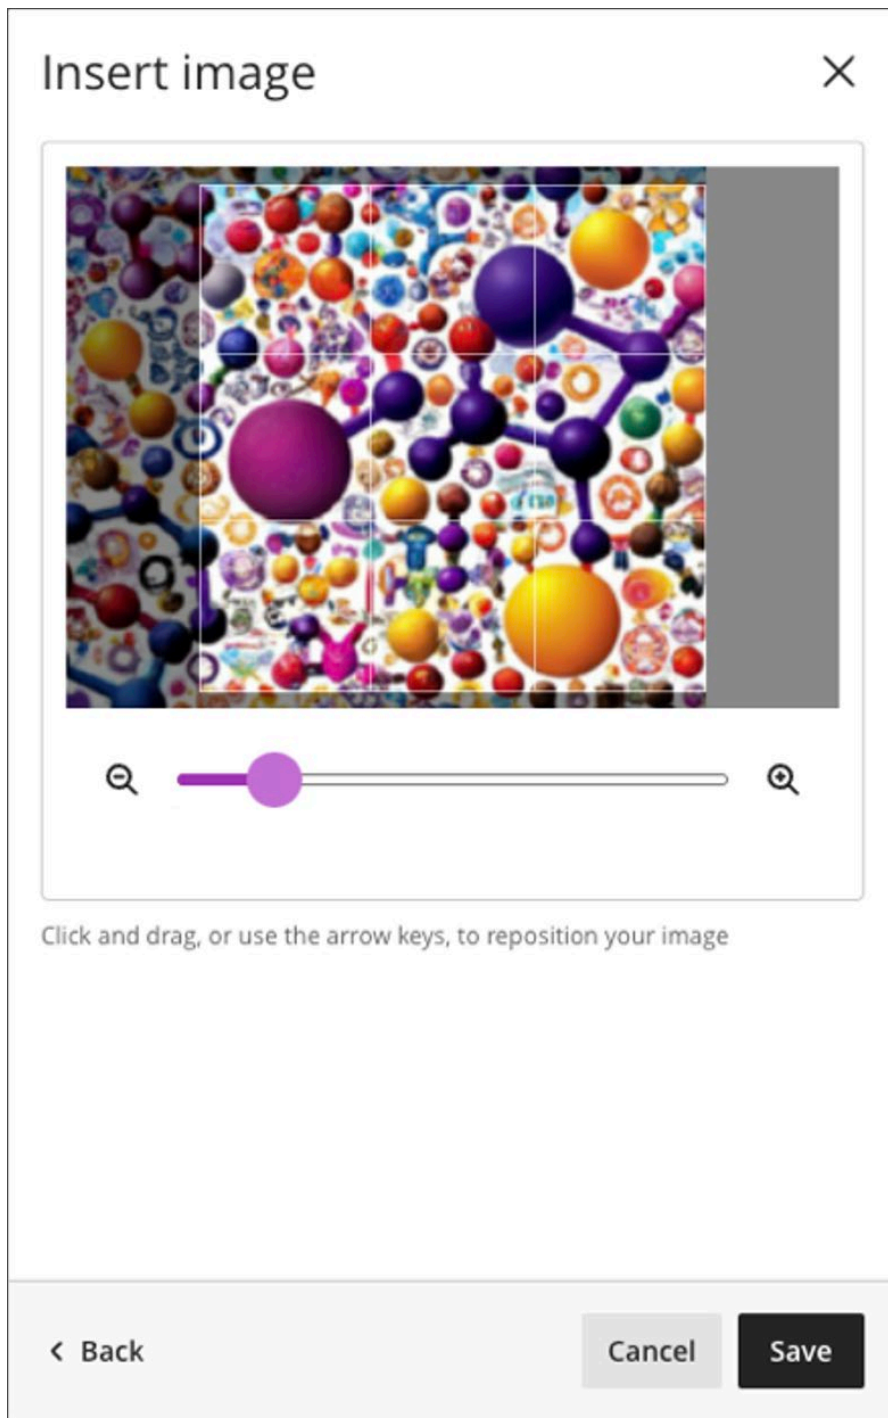

Note that images will automatically appear if your administrator activates “Generate keywords for Unsplash.”

Image 3: Generate images using AI Design Assistant

Once the ideal image is selected, the instructor can choose the focal point of the image.

Image 4: Select focal point of the image

The image is marked as decorative by default. The instructor can untick 'Mark the image as decorative' and add specific alternative text.

Image 5: Image marked as decorative.

Image

Accessibility

An image description makes it easier to connect the image to its context and allows people with visual impairments to perceive the image. [Learn how to describe an image.](#)

Alternative text

Describe the image for assistive technologies

Mark the image as decorative
This image provides no additional value and is only decorative. It will be hidden for people using assistive technologies.

Advance in sequence

Students can access a module's content in sequence.

A course link cannot be added to a learning module when a forced sequence is activated.

Forced Sequence

The coursebannerimage from Unsplash

The course banner image provides an important sense of identity for the course. We are expanding the image options for the course banner by introducing Stock Images from Unsplash. Instructors can enter keywords to search for high-quality, royalty-free images.

Image 5: Add image option when editing the display settings

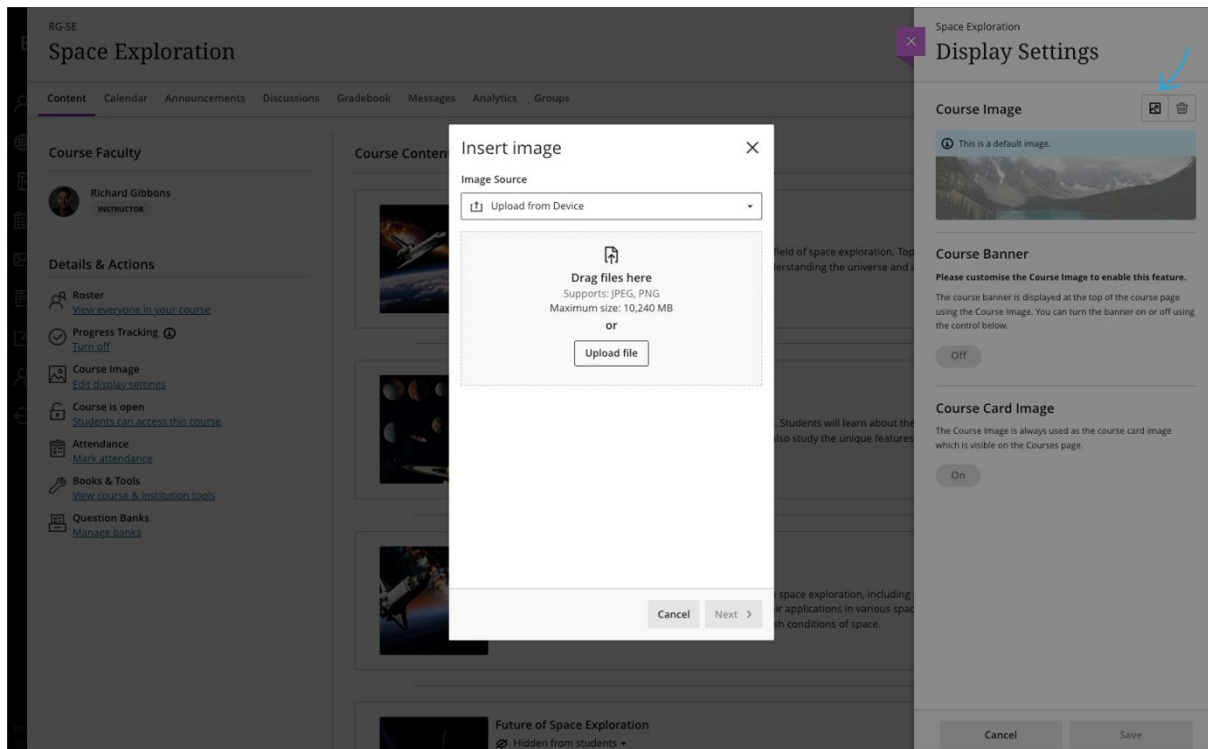

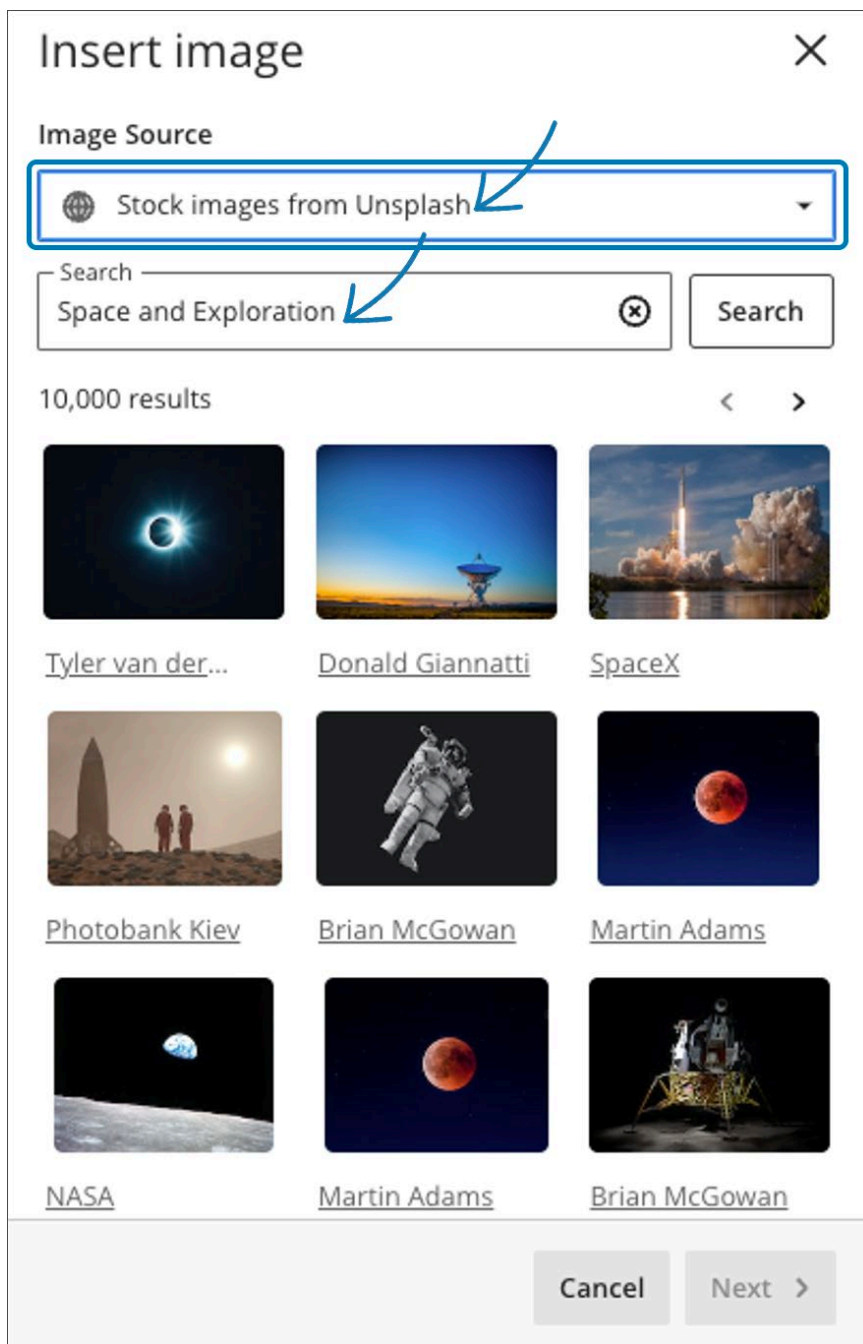

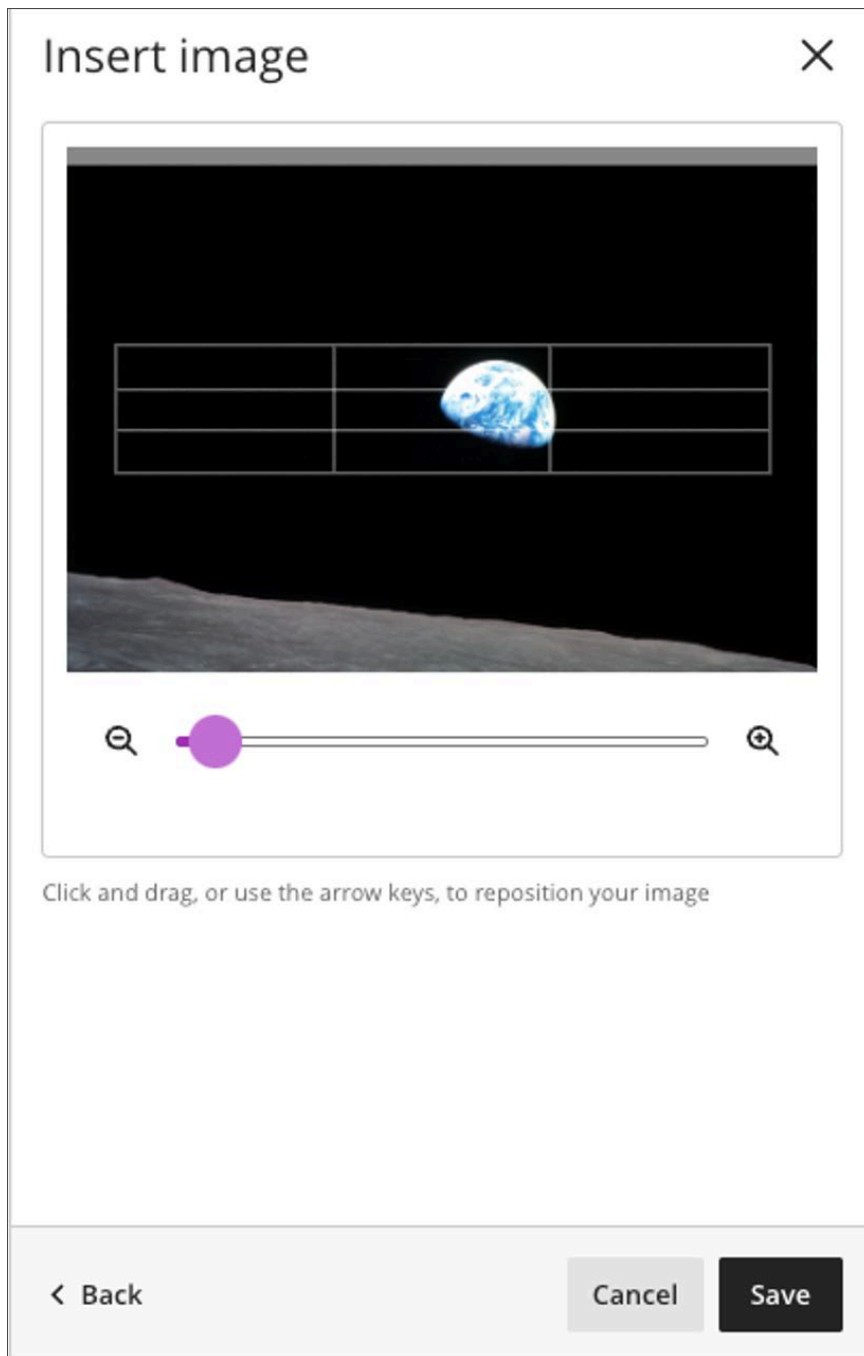

Image 6: Enter keyword(s) and search stock images from Unsplash

Images will automatically appear if your administrator has activated "Generate keywords for Unsplash." Once the ideal image is selected, the instructor can choose the focal point of the image.

Image 7: Select focal point of the image

The image is marked as decorative by default. The course banner toggle is turned on. The instructor can untick 'Mark the image as decorative' and add specific alternative text.

Course Banner

The course banner is displayed at the top of the course page using the Course Image. You can turn the banner on or off using the control below.

On

Additional image insertion and generate options

Images enhance comprehension of and engagement with course content. Instructors and students want to use high-quality images in content and submissions. To help, we have added a new image button in the content editor in the following places:

- Announcements
- Assessment Questions
- Student answers on questions (local file upload only)
- Submission feedback (standard view)
- Journal entries and comments

Image 9. Instructor view - image button on content editor for Announcements

The screenshot shows the 'New Announcement' form in the instructor view. The form is titled 'Space Exploration' and 'New Announcement'. It has three main sections: 'Title', 'Recipients', and 'Message'. The 'Title' section has a text input field with the placeholder 'Type an announcement title'. The 'Recipients' section has a dropdown menu with 'All course members (2)'. The 'Message' section has a rich text editor with a toolbar. The toolbar includes buttons for undo, redo, bold, italic, underline, link, unlink, and image. The image button is highlighted with a blue box and labeled 'Image'. Below the message editor is a 'Word count: 0' indicator. At the bottom of the form, there are two checkboxes: 'Send an email copy to recipients' and 'Schedule announcement'. The 'Send an email copy to recipients' checkbox is unchecked, and the 'Schedule announcement' checkbox is also unchecked. At the bottom right of the form, there are 'Cancel' and 'Save' buttons.

We also added the option for instructors to generate images in journal prompts and assessment questions.
